

in JCB

LETTER FROM THE DIRECTOR

Welcome to the newly redesigned *in* JCB, in living color. This is one of many contributions we have received from Margot Nishimura, who joined the JCB in July as our Deputy Director and Librarian. A historian of the book, Margot has also written several, including *Images in the Margins* (Getty Museum Publications, 2009), a study of medieval marginalia. She is a seasoned administrator as well, coming to us from RISD, where she taught art history and directed traffic from the Provost's office. Another recent arrival is Roseanna Gorham, the JCB's first Fundraising Coordinator. She is a JCB veteran in her own way – she worked with us in 2006 when she organized a very successful commemoration of the French army's march from Rhode Island to Virginia at the end of the American Revolution. And our Watts Program in the History of the Book continues to advance by leaps and bounds, thanks to the two "bookends" who are now directing its fortunes, Suzi Cozzens and Abby Saunders. Suzi is a local letterpress printer, book artist, and Critic in Graphic Design at RISD. Abby is a graduate student in Library Science at Simmons College.

As usual, we are combining new and old with this newsletter, and that is true to the nature of the work day inside the JCB. Our digital programs continue to generate extraordinary use (and gratitude) around the world. Following the launch of *Remember Haiti* in 2010, we received numerous honors, and in the fall of 2011 we will unveil a similar site dedicated to our remarkable Peruvian collection. In the year to come, we expect to launch additional sites dedicated to Portugal/Brazil and to the indigenous languages of the New World. I do not wish to describe events that are perfectly well described elsewhere in this newsletter, but I do want to say that these projects have transformed the way that the world reads our books. From every continent on earth, at any time of day, readers can look at a rare book from the JCB. If they feel inclined, they can underline the book, or cut and paste it – which they certainly cannot do while looking at the original. When we began providing free access, only two years ago, we were one of a small handful of rare book libraries who did so – now this is becoming standard practice. Thank you, David Rumsey, for the boldness of your vision.

Our new activity never threatens our traditional work. We will always take superb care of the treasures that live here, and this fall we are hoping to create a new fund named after the late JCB Governor, William Warren, to enlarge the resources we can devote to the essential labor of conservation. Please consider a gift to help us protect or repair a particular favorite from our collection. And by all means, stop by to see us in person. As this issue colorfully proclaims, every day brings something new.

Edward L. Widmer

Beatrice and Julio Mario Santo Domingo Director and Librarian

DRUGS FROM THE COLONIES:
THE NEW AMERICAN MEDICINE CHEST

From September 27 to December 22, the JCB will host an intellectually and visually delightful exhibition on drugs from the New World. It is well known that the introduction of native American foods radically improved the early modern European diet. Maize, potatoes, cacao, and a great range of peppers and gourds are still among the most familiar – and nutritionally rich – American contributions to what is now called the Columbian Exchange. Somewhat less well known is the vast array of New World plants that revolutionized European medicine. Europeans who lived among the indigenous Americans, many of them missionaries, studied traditional medical applications and described them in print for a European audience. Artists and naturalists were drawn (or sent) to further study, illustrate, and disseminate the vast botanical treasure trove of the Americas. As a result, the Old World practice of medicine, largely inherited from the ancient Greeks and Romans, was forever transformed, with much of this New World pharmacopeia still

Francesco Torti (1658-1741), *Therapeutice specialis ad febres periodicas perniciosas*, Frankfurt & Leipzig, 1756. *Lignum Febrifium*.

Italian physician Francesco Torti presented evidence that cinchona was effective only against a limited group of diseases. His "Tree of Fevers" portrayed the cinchona plant stylistically as a taxonomy, or orderly classification, of known fevers with related characteristics. Only intermittent fevers like malaria were susceptible to treatment with the bark. Under Torti's imaginative presentation (with the aid of a skilled engraver), the branches covered with bark represent fevers for which cinchona may be used. The barkless, leafless branches show conditions that cinchona will not affect. The center represents a gray area with partially barkless branches where further evaluation of the patient's condition was necessary, in Torti's view, to judge whether the bark could be effective. The new way he offered of organizing and categorizing information on diseases advanced medical thinking, cleared a path for wider acceptance of cinchona, and challenged the traditional humoral philosophy that relied on the old regimen that included bloodletting.

The John Carter Brown Library is an independently funded and administered institution for advanced research in history and the humanities founded in 1846 and located at Brown University since 1901.

Cover: Maria Sibylla Merian (1647-1717). *Dissertatio de generatione et metamorphosis insectorum Surinamensium*, Amsterdam, 1719, Plate 26. Cacao.

Theodor de Bry, *Der ander Theil der newlich erfundenen Landtschaft Americae* . . . [America, Part 2. German], Frankfurt am Main, 1591, Plate 20. *Welcherley Gestalt sie ire Krancken zu heylen pflagen* (“How they heal the sick”).

De Bry’s caption to this picture explains the Indian methods of healing that the French encountered in Florida: They fashion benches and place the patients on their backs or stomachs, depending on the ailment. The healer cuts the patient’s forehead with a shell and sucks blood that is emptied into a vessel. Women who are pregnant or breastfeeding drink the blood to strengthen their children. Patients on their stomachs inhale smoke from embers, causing them to vomit and thus expel the illness from their bodies. Other patients inhale smoke from dried leaves called Ubannock, Petum or Tobacco, and expel it, helping to discharge morbid fluids. The Indians described are from one of the Timucuan-speaking tribes that then inhabited the northern part of Florida.

being plumbed for its curative powers in the laboratories and clinics of today. *Drugs from the Colonies* celebrates the print and manuscript culture that ignited and fed this pharmacological revolution.

On view from the Library’s collections are 67 books and manuscripts that document the European reception of medicinal knowledge and plants from the Americas, many of which are spectacularly illustrated. Perhaps most famous, and most surprising, among substances showcased by the exhibition is chocolate. “Discovered” by the conquistadors in 1525, chocolate became at the time one of the most widely discussed “drugs” with the pleasure of its consumption, thankfully, never entirely lost to science. Cacao, from the seeds of which cocoa and chocolate are made, was one of 3,000 medicinal plants that Francisco Hernández collected and described from 1571 to 1577 in his magisterial study of New World botany commissioned by King Philip II of Spain – represented in the exhibition by two versions, one print, one manuscript. Alongside Hernández is Eberhard Happel, who made the claim in his *Thesaurus exoticorum* (Hamburg, 1688) that chocolate “serves to strengthen the chest, drives away all nasty vapors . . . crushes and disperses stones (calculi) and ill humor, and maintains the body in good health.” To illustrate his point, he included a woodcut portrait of a most healthy looking Moctezuma, last king of the Aztecs, who reputedly enjoyed 50 mugs of liquid chocolate a day.

The exhibition tells a different story about tobacco, which even in the early days of its investigation as a medicinal agent had a mixed reception. Having perhaps one of the most substantial impacts of all New World plants on economies and social behavior on both sides of the Atlantic, tobacco was viewed by many European doctors as, at best, a likely panacea, or, at the very least, a convenient medium for introducing other medications into the body. There were, however, a number of early physicians who wrote of recreational smoking as an “abuse” of tobacco, and Bernardino Ramazzini (1633-1714) pointed out specific medical hazards faced by workers in the tobacco industry. In his *De morbis artificum diatriba* (Geneva, 1717), Ramazzini described

an alarming array of ills suffered by tobacco workers, including disorders of the head, lungs, and stomach, and advised them to cover their nose and mouth and to breathe fresh air as often as possible.

Diseases as well as medicines were part of the Columbian Exchange. At the end of the 15TH century, European science confronted the medical riddle of syphilis, seemingly unknown before the return of Columbus’s ships from the Caribbean. Treatment efforts seized on *guaiacum*, a plant found in South America, and its therapeutic properties were promoted in print across Europe from the 16TH century on. Most prominently celebrated in 17TH-century print sources – and apparent from the numerous instances exhibited – would be the investigation of *cinchona* by Spanish physicians in Lima in the 1630s. Jesuits brought the bark of the plant to Rome around 1631 to treat malaria. Through their agency it came to be called Jesuits’ bark or Peruvian bark. The rival name was introduced when the Condesa de Chinchón, wife of the Peruvian Viceroy, was herself cured of malaria in 1638. Physicians required some time to research the proper dosage and course of treatment, as well as eliminating the various species that were unhelpful. Many medical dissertations focused on some small aspect of this quest, and the vital agent quinine would not be isolated until 1820, but that will have to be the subject of another exhibition, or perhaps a conversation over a restorative gin and tonic.

Dennis C. Landis

See www.jcbl.org for the online version of the exhibition.

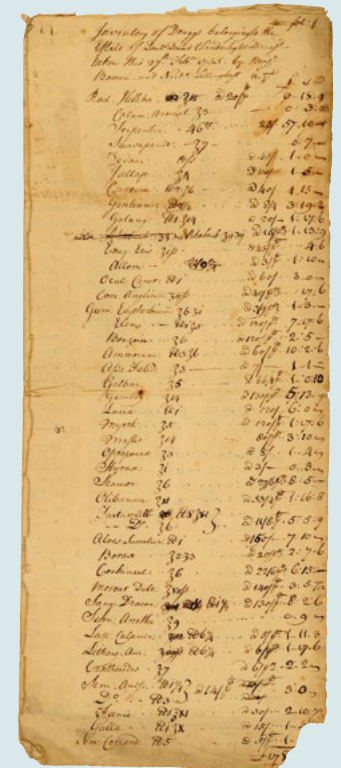

Maria Sibylla Merian (1647-1717), *Over de voorteeeling en wonderbaerlyke veranderingen der Surinaemsche insecten*, Amsterdam, 1719, Plate 55. *Piper indicum* (*Capsicum anuum*).

Capsicum was of great importance to Native American medicine and continues to be used in both conventional and herbal remedies. The chemical capsaicin, which can be extracted from most peppers, is used in modern medicine as a circulatory stimulant and analgesic, chiefly in topical applications.

A MEDICAL PRACTICE IN 18TH-CENTURY RHODE ISLAND

Among the unique objects on display for *Drugs from the Colonies* are an inventory and account book for Dr. David Vanderlight, a Dutch physician, who married into the Brown family and conducted a medical practice in Providence in the mid-18th century. Vanderlight’s account book for the early 1750s and the inventory of property made upon his death offer a rare and intimate glimpse into a medical practice of the New England colonial period. He prepared his own prescriptions, and had at his disposal a wide variety of medications of both Old and New World origin. A long list of medications and supplies included such drugs as sassafras, jalap, Peruvian balsam, copaiba, Peruvian bark, contrayerva root, ipecacuanha, and chocolate.

Inventory of Druggs...taken this 27TH Feb. 1755 by Benj. Bowen and Nich. Tillinghast, vizt. Providence, Rhode Island, 1755.

A KEY INTO A 17TH-CENTURY MYSTERY: INVESTIGATING ROGER WILLIAMS' SHORTHAND

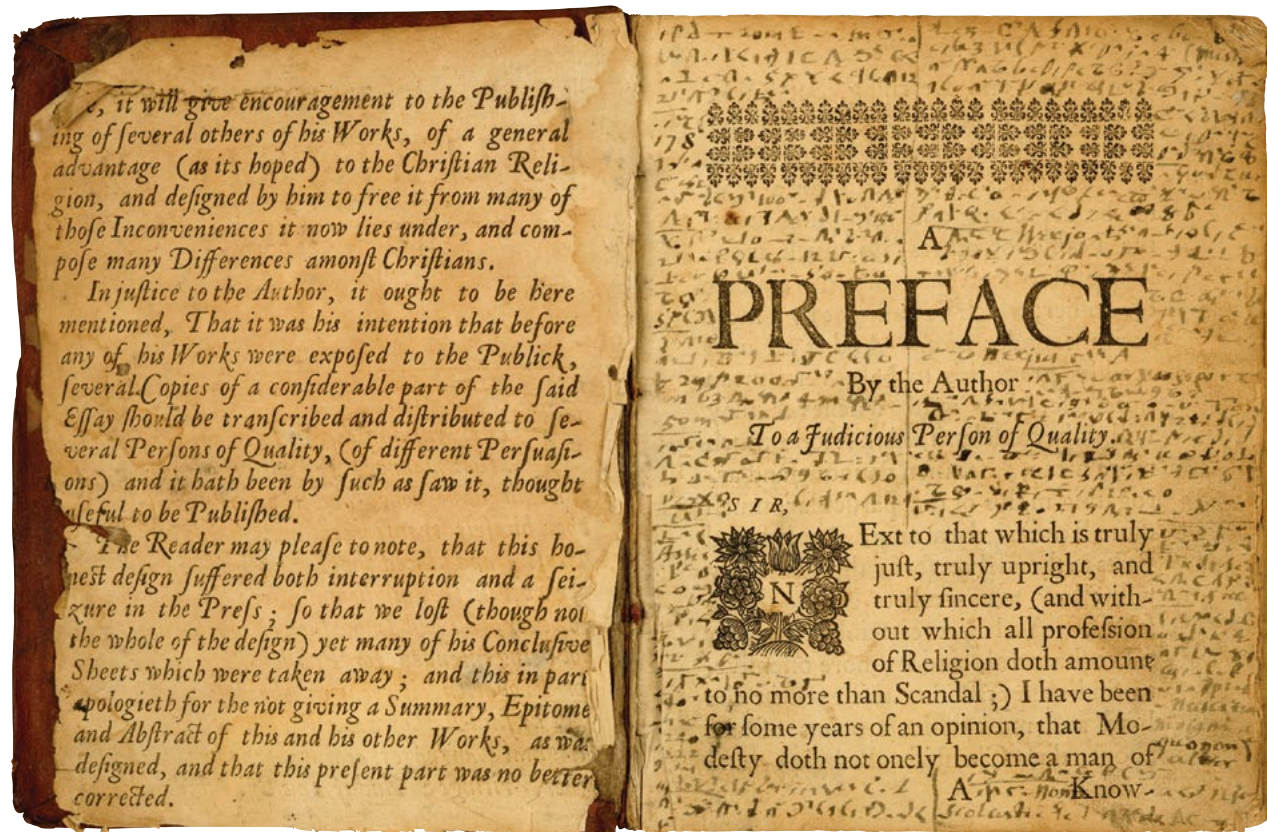

From late September through the end of November a small, special exhibition in the MacMillan Reading Room will showcase one of the bibliographic mysteries of the Library's collection: a 17th-century book, lacking a title page, subtitled, "An Essay Concerning the Reconciling of Differences among Christians," with the margins of nearly every page filled with cryptic annotations rumored to be from the hand of Roger Williams.

The book entered the Library's collection accompanied by a letter asserting that the intriguing shorthand annotations on nearly every page were made by Roger Williams, who had learned "the art of stenographic" as a young legal clerk. Coinciding with the 375th anniversary of the settlement of Providence, the exhibition will advertise an exciting proposal to explore this enigmatic item and its potential connection to the founder of the colony.

We hope that a display of the book and related items will ignite interest in undertaking the investigation as a Group Independent Study Project (or "GISP") by Brown undergraduates. Deciphering 17th-century shorthand is a laborious process and a relatively rare skill, even among historians. With the guidance of faculty members and other experts, we would like to provide undergraduates with the opportunity to learn the techniques necessary to investigate all aspects of this bibliographic puzzle, including the experience of decoding the annotation. *Kimberly Nusco*

Author unknown, [lacking title page] *A Preface By the Author to a Judicious Person of Authority*, London, specific date unknown (17th century). *Second title page with marginal notation in shorthand, possibly by Roger Williams.*

COMING SOON COLONIAL PRINTER REDUX

Colonial Peruvian printers impressing paper with the words "Carlos II" (Charles II, King of Spain 1665-1700). From Parentacion real al soberano nombre e immortal memoria del Catolico Rey de las Espanas y Emperador de las Indias, Lima, 1701.

Pillage du Cap Français en 1793 (detail), engraving, Paris(?), ca. 1795.

On view as part of the NYHS Revolution! Exhibition opening November 11 is the JCB's print showing the pillage of present-day Cap-Haïtien (identified here as Cap Français) by insurgents who took the town in June 1793. Depicted as carnival as much as conflict, the pillage includes scenes of celebration, looting, and drunkenness.

In 1931, Lawrence Wroth published *The Colonial Printer*, still one of the most important resources for all aspects of the history of the book in British North America up to 1800. It was expanded in 1938 and reissued several times between then and 2004, and while Wroth was thorough in his descriptions, he included very few illustrations of the books he mentions. JCB copies of many of these books will be visible, however, in the MacMillan Reading Room from early January to late April 2012. Ken Ward, Maury A. Bromsen Curator of Latin American Books, has worked with Brown senior Rebecca Levinson '12 to put together a companion exhibition to *The Colonial Printer*, complete with historic objects related to printing – on loan from the Updike Collection at the Providence Public Library – as well as archival materials, such as galley proofs with Wroth's own notes, that trace the publication of the book itself. The exhibition will be a focal point of this year's Watts History of the Book "PAPER PRINT BOOK" program, and indeed grew out of former program director Lisa Long's tremendous efforts with Watts (more on which, see p. 8). *Kenneth Ward*

JCB AND THE "REVOLUTION!" AT NEW-YORK HISTORICAL SOCIETY

The New-York Historical Society is about to re-open its doors after an extensive renovation. On the auspicious day of 11/11/11, the holdings of the John Carter Brown Library will be on full display, as highlights of the new exhibition, *Revolution! The Atlantic World Reborn*. The exhibition will celebrate unknown features of all three of the major revolutions that rocked the Atlantic in the late 18th century – the American, French, and Haitian – and the ways in which they intersected. The JCB's holdings have always been strong in the latter revolution, and have been augmented by a burst of acquisition activity in the last few years. For many friends of the Library and former Fellows, it will be the first chance to see some of these new old treasures. When asked about the JCB's contribution, exhibition curator Richard Rabinowitz expressed his gratitude for the loan of the hard-to-find Haitian materials: "*Revolution!* counts no fewer than two dozen treasures from the collection of the John Carter Brown Library. Their texts help us tell the dramatic story of the upheavals that created our modern ideas of liberty. But more than that, their physical reality brings us immeasurably closer to the hands, eyes, and minds of the heroes of that story." We encourage all in the JCB community to visit the NYHS for this exciting exhibition, and to join us for a day-long symposium co-sponsored by the JCB to be held at the NYHS in conjunction with the exhibition on January 21, 2012 (see back cover for more details). *Ted Widmer*

DISTINGUISHED VISITORS: WYCLEF JEAN AND COLOMBIAN PRESIDENT JUAN MANUEL SANTOS

Shortly after he stepped out of the Haitian presidential race in 2010, musician and record producer Wyclef Jean was awarded a visiting fellowship to Brown's Africana Studies Department. On October 18, 2010, he visited the JCB to look at our Haitian materials, and in the image to the right is shown examining, among other pieces, the "Pillage du Cap Français" engraving that is reproduced on the previous page in relation to the NYHS *Revolution!* exhibition.

On April 5 of this year, president of Colombia, Juan Manuel Santos, visited the Brown University campus to give the 4TH Stephen A. Ogden, Jr. Lecture on International Affairs, "Why People Should Give More than a Damn About Latin America." Prior to his lecture, President Santos dropped by the JCB for a visit to the Bromsen-Bolívar Room and a look at some of our materials related to Colombia. President Santos later publicly praised the JCB's commitment to the study and preservation of Latin American materials. *Kenneth Ward*

Wyclef Jean at the JCB on October 18, 2010.

Juan Manuel Santos speaking at Brown.

NEH SUMMER SCHOLARS AT THE JCB

This past July the JCB provided a workshop for an NEH Summer Institute for School Teachers, sponsored by the Rhode Island Historical Society. With "The Role of Slavery in New England Commerce, Industry, and Culture to 1860" as their theme, thirty K-12 teachers from all over the country visited the Library on the afternoon of July 22 to learn about our resources and to view materials from the collection.

Reference and Manuscript Librarian Kimberly Nusco presented items from the Library's holdings of early American business records that illustrated aspects of the Rhode Island slave trade, the role of Rhode Island in provisioning plantations in the West Indies, and debates surrounding the issue of slavery in New England. Digital Imaging Manager Leslie Tobias-Olsen demonstrated the JCB's various online resources that could be useful to educators in developing curricula.

When asked, the teachers agreed that the highlight of their visit was seeing the records of the slave ship Sally, a vessel sent by the Brown brothers to the coast of Africa under the command of Captain Esek Hopkins, who would later become the Commander-in-Chief of the Continental Navy. The documents from the Brown family business records provide vivid testimony about the workings of the slave trade, and were used in the development of the report produced by Brown University's Committee on Slavery and Justice. While many of the documents can be viewed online (<http://www.stg.brown.edu/projects/sally/>), the visiting teachers especially appreciated the opportunity to view this material firsthand, and several chose to extend this experience by returning to the Library the following week to research their own individual curriculum topics. *Kimberly Nusco*

This Bill of Lading for the slave ship Sally was among the papers that participants in the NEH Summer Institute for School Teachers on slavery in New England were able to view firsthand at the JCB. Prominent in the lower right of the image is the signature of Esek Hopkins.

MANUSCRIPT SOCIETY VISITS THE JCB

On June 2 the JCB presented a program for the Manuscript Society, which was visiting Providence for its 2011 annual meeting. After a morning visit and lecture on Lincolniana at the John Hay Library, approximately 60 members of the Society attended a talk about the JCB's manuscript holdings. Kimberly Nusco, Reference and Manuscript Librarian, spoke about her work with the Library's holdings of early American business records, including the papers of the Brown, Arnold, and Tillinghast families. Curator Ken Ward then presented highlights of the Library's remarkable collection of manuscripts from Central and South America, including our recently acquired 1713 Guaraní manuscript—the only known example of devotional exercises in that language (see *inJCB*, Fall 2009, p. 3).

The Manuscript Society is an international organization whose members include collectors, archivists, librarians, dealers, and the staff of auction houses. The Society maintains a publication program, offers scholarships, and provides assistance in replevin cases. *Kimberly Nusco*

During their visit to the JCB members of the Manuscript Society had a chance to look at our great collections of business papers, among which are two cash books kept by George Washington – in his own hand – from 1794 to 1799. In the pages shown here, from August 1797, Washington details payments to his cook and plasterer, and in item 29 connects to parents of college-bound children of all generations with the following entry: "Sent Doctor Smith, the President of Princeton College on account of G. Washington Custis's Board, Schooling and expenses, 150 dollars; – and 40 dollars more to be given to Mr. Custis to bear his expenses home at vacation." George Washington Custis (1781-1857) was Washington's step-grandson, and the son of Martha Washington's son, John Parke Custis, from her first marriage.

WATTS HAPPENING

104 people, more than twice the expected turnout, packed the MacMillan Reading Room on September 15 for Douglass Scott's "Panoply of Paper" – the opening event of this year's Watts History of the Book "PAPER PRINT BOOK" Program. Suzi Cozzens, Watts "Curator" for 2011-12, has much more in store to fulfill the Watts charge to bring Brown University and Rhode Island School of Design undergraduates together to learn about the culture, history, and arts of the book. Following Scott's lecture, ten lucky students got their hands wet in a paper-making workshop (there was a waiting list of thirty), the first of a series of practical lessons designed to complement the lectures, book talks, and other programming for Watts this year.

Enthusiastic participation stems in part from last year's successful programming by former Watts Program Manager Lisa Long-Feldman. The 2010-11 season was diverse, ranging from conservation demonstrations to on-demand printing with then provocateur-in-residence Andrew Losowsky. Over two hundred students attended events throughout the year, and the season culminated in a Pecha Kucha-inspired book talk night in April, when students and local bibliophiles shared their love of books through illustrated mini-lectures.

A full schedule of Watts events can be found on www.jcbl.org. The remaining lectures for the Fall are listed in the Calendar on the back cover of this edition of *inJCB*. *Abby Saunders*

Watts students in the RISD Papermaking Studio.

PIRATES AND SEA MONSTERS: THE HUNGRY OCEAN LAPS AT THE SHORES OF THE JCB

The Hungry Ocean Conference on Literary Culture and the Maritime Environment brought a crew of international scholars across the World's oceans to the JCB on the weekend of April 21-23, 2011. The events launched Thursday afternoon when conference organizer and former JCB Fellow Steve Mentz of St. John's University teamed with curator Susan Danforth to fill the downstairs conference room with examples of the library's rich holdings in maritime atlases, including rare portolans and a massive 18TH-century volume ghost-written by Daniel Defoe. The next two days were full of salt and scholarship, starting on Friday with Margaret Cohen of Stanford University's keynote on modernist aesthetics and the early years of underwater photography. In the evening, Bernhard Klein of the University of Kent examined the current state of early modern maritime scholarship in a talk with the wonderful title, "Fish Walking on Land."

A highlight of Saturday's events came just after lunch, when historian and musician Geoff Kaufman performed and sang sea music inside the JCB while discussing its historical roots and functions. Before Geoff could take the stage, however, the Reading Room was briefly over-run by pirates, as the members of ARR, a well-dressed crew of Brown undergraduates with an interest in maritime music, stormed inside to give us a rousing rendition of the homeward-bound capstan shanty "Rolling Down to Old Maui." *Steven Mentz*

LAUNCH OF THE JCB PERU SITE

The JCB has one of the greatest collections of books printed in Peru in the colonial period, including more pre-1600 imprints than any other library in the World. Among these is the first item off the first press in Lima, the *Pragmatica sobre los diez*, printed by Antonio Ricardo in 1584, as well as all four books published in Juli prior to 1600. Lima and Juli were the only cities at this time in Spanish South America with presses, and thus their publications address issues from all parts of the region. Of particular strength in the JCB collection are government documents and indigenous languages. For works in Quechua and Aymara, two languages still very widely spoken in South America, the JCB in some cases has the only known copies.

To celebrate the strengths of our Peruvian holdings, and to make them more broadly accessible, the JCB has scanned and created digital facsimiles of all its Peruvian imprints – as part of our ongoing efforts to digitize the entire Library. Accompanied by the meticulous bibliographic documentation of retired cataloger Dr. Michael T. Hamerly, over 1,000 JCB Peruvian imprints can now be accessed in their entirety through the Internet Archive at <http://www.archive.org/details/jcbperu>.

Of course, not all potential audiences will benefit from just making the books themselves available online, so as with our collection of Haiti materials, the JCB is also launching a curated bi-lingual website to provide an interpretive entryway into the Peru collection. Selections and descriptions were made by Jeremy Mumford, a specialist on the colonial Andes and Visiting Assistant Professor at Brown, and JCB Curator Ken Ward. With sections focused on Conquest; Languages of South America; Indians of Peru; The Church; Lima, City of Kings; Science and the Enlightenment; Independence; and Maps, the chosen highlights will provide an excellent introduction to the collection as a whole. *Kenneth Ward*

SCANNING BY THE NUMBERS DIGITIZATION MILESTONES

It has been almost a year and half since the Internet Archive came to the JCB. To date we have over 3,200 books online, which amounts to more than 360,000 digitized pages. To give some sense of the reach of the online collections, as of the end of August, we logged 66,688 downloads of JCB titles from the Internet Archive. The

JCB is now in the top 9% of libraries in number of books online in Americana. Of all the JCB books digitized, there are so far only 5 titles that were previously available in their entirety online. To visit the online collection – and download a title or two for vacation reading – go to: www.archive.org/details/JohnCarterBrownLibrary *Xephyr Inkpen*

The four JCB collections now online with number of books:

Argentina	117
Haiti	916
Peru	1,020
Portugal & Brazil	1,132

The 3 most popular books of the JCB's online collections:

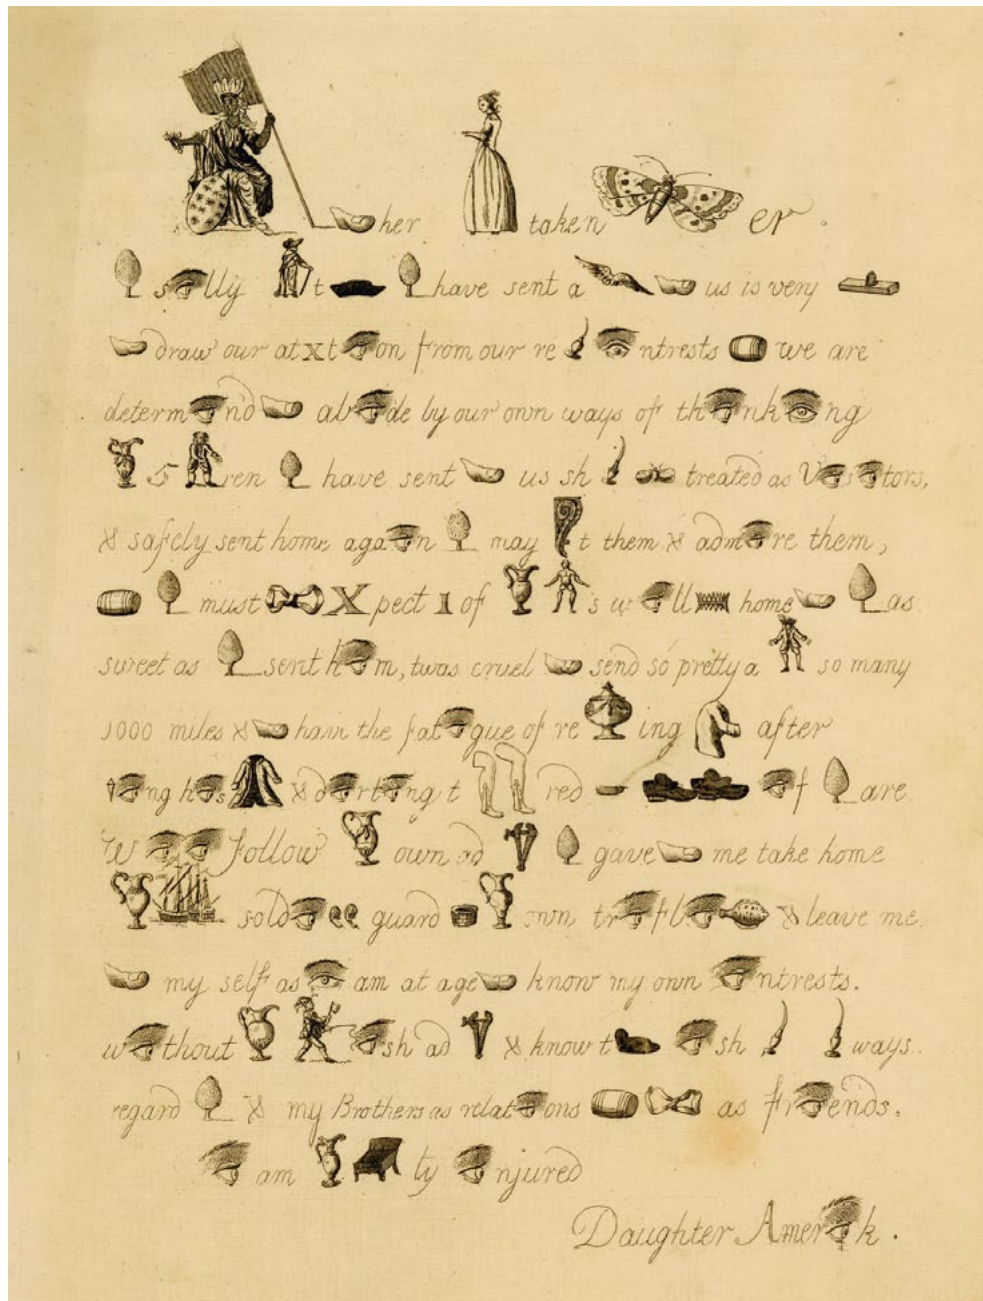

Downloads	Collection	Title
388	Peru	<i>Arte de la lengua general del reyno de Chile</i>
280	Haiti	<i>Gazette de Saint-Domingue</i>
275	Haiti	<i>Histoire naturelle et morale des Indes</i>

REMEMBER HAITI WINS PRAISE

The Library's site *Remember Haiti* (see *inJCB* Fall 2010, pp.1-2) has garnered an impressive number of accolades. It was immediately named an American Library Association "Digital Library of the Week" in May 2011 and in June won an honorable mention from the Association of College and Research Libraries Rare Books and Manuscripts Section *Leab American Book Prices Current Exhibition Award*. Singling out its "elegant interface," the ACRL committee commended the site especially "... for its innovative use of the Internet Archive to curate an exhibition that is both historical and topical," and for the "numerous points of entry" that it offers for a broad audience.

NOW ONLINE: POLITICAL CARTOONS

[America] [toe] her [miss]-taken [moth]-er. Engraving, London, 1778. 35.1 x 25 cm.

The latest addition to the JCB's online image databases features political cartoons of the colonial Americas, from Hudson Bay to Tierra del Fuego, drawn entirely from primary sources printed or created between 1492 and ca. 1825. Featured here is one of the more "puzzling" of the 462 satirical images, a "hieroglyphic letter" described by Hugh Honour as "dealing sarcastically with the Peace Commission sent to America by Lord North in 1778 after the French Alliance." See if you can decipher the rebus. Hint: This is one of a pair of engravings – the response, in fact, to the first of the pair entitled *Britannia to America* that "begs acceptance of the Peace Commission, warns America against the double-faced [French] king, and entreats her return."*

To explore more of the Political Cartoons at the JCB, go to the "Online Resources" menu at www.jcbl.org.

THE SOLUTION TO THE PUZZLE:

AMERICA TO HER MISTAKEN MOTHER, You silly old woman that you have sent a lure to us is very plain to draw out attention from our real interests, but we are determined to abide by our own ways of thinking. Your 5 children you have sent to us shall be treated as visitors, & safely sent home again. You may [carved bracket/corbel?] -t them & admire them, but you must not expect I of your puppets will come home to you as sweet as you sent him. 'Twas cruel to send so pretty a man so many 1000 miles & to have the fatigue of returning back after soil[?]-ing [object looks like a dibble, which could be a reference to soil] his coat and dirtying those red heel shoes. If you are wise, follow your own advice you gave to me. Take home your ships, soldiers. Guard well your own trifling [fish?] & leave me to myself as I am at age to know my own interests without your foolish advice & know that I shall always regard you & my Brothers' relations but not as friends. I am your greatly injured Daughter Amerik.

* Hugh Honour, *The European Vision of America*, Cleveland Museum of Art, 1975, no. 235.

PERU COLLECTION CONTINUES TO GROW

In support of our Peru digitization project, the JCB made a spectacular purchase of Peruvian imprints in 2010. Already one of the largest collections of Peruvian imprints in the world, the purchase added almost 90 items to the collection, a good number of them unique copies, unknown to bibliographers. The earliest of these titles, Alonso Ramos Gavilan's *Historia del célebre santuario de nuestra señora de Copacabana*, dates from 1621. Among the most remarkable is a copy of José Miguel Duran's *Replica apologetica*, which was published in 1773 following the Sixth Council of Lima. Central to the Council's debates was the theological idea of Probabilism (the view that when in doubt about how we ought morally to act we may follow any reputable authority), an idea that had been strongly supported by the Jesuits prior to their expulsion in 1767. Duran supports Probabilism in this work, which earned him the condemnation of the Inquisition, and the recently acquired copy at the JCB bears the inscription "*Prohibido en totum*," "Prohibited in its entirety." Kenneth Ward

José Miguel Duran. *Replica apologetica*, Lima, 1773.

LONG BEFORE THE SNOWBIRDS

This manuscript map, attributed to Pedro Diaz Berrio y Palma (b. 1746), extends from the Florida Keys to just north of Savannah, Georgia, and west to the Rio Perdido, just beyond Pensacola. The map's emphasis on topographical detail, its focus on the whole of Florida, and the inclusion of Indian settlements in the interior, especially in the north, suggest that its purpose was military in nature and that it was perhaps part of a reconnaissance effort by Spanish officials in Cuba who were planning a future re-occupation of Florida. While the Spanish lost control of the territory to the British from 1763 to 1783, they never lost interest in their claims. There is also evidence suggesting that in 1769 the Spanish were actively meeting with the Indians along the northwest coast of Florida, courting their allegiance and support for a future re-occupation. Susan Danforth

Mapa topografico de la Florida lo dibuxo Pedro Diaz ano de 1769 por mandato Ilmo Senor Don Jose Puerto Llano de Canales. [Havana], 1769. Manuscript. Acquired with Black, Watson, and Harper Funds.

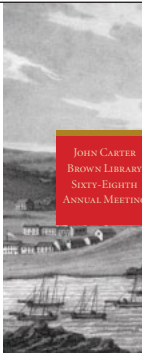

STAFF PICK: THE COMMON POT BY LISA BROOKS

Adelina Azevedo Axelrod joined the staff of the John Carter Brown Library in 1986 to work on *European Americana*. A library degree and 25 years later, she is the reference book cataloguer and keeper of Fellows' publications for the library.

For readers of *inJCB* Fall 2011, Adelina recommends *The Common Pot: The Recovery of Native Space in the North East* (Minneapolis: University of Minnesota Press, 2008) by Lisa Brooks (Abenaki). Noted for her success in bringing native voices to the forefront of American history, Brooks in this publication focuses on the central role of writing in Algonquin and Iroquoian communities of the 18TH and 19TH centuries. In petitions, journal entries, tracts, and speeches, the writing of native leaders – which often itself relied on the metaphor of the Common Pot – connected native communities across space and time and would be key to efforts to reclaim rights and native lands in the northeastern United States. The book includes fifteen maps, which are especially helpful in locating place-names mentioned in the chapters. Brooks was a 2001-02 JCB Fellow and is now Assistant Professor of History and Literature, Folklore and Mythology at Harvard.

ANNUAL MEETING 2011

	<p>THE CHAIRMAN AND OFFICERS OF THE ASSOCIATES OF THE JOHN CARTER BROWN LIBRARY TAKE PLEASURE IN ANNOUNCING THE SIXTY-EIGHTH ANNUAL MEETING</p>	<p>FOLLOWED BY A LECTURE BY MARIE ARANA BOLIVAR'S DREAM <i>The Transcendent Vision and Harsh Realities of Simón Bolívar's Liberation of South America</i></p> <p>Simón Bolívar faced extraordinary challenges in the liberation and founding of six Latin American nations: an entrenched colonial system that had isolated Spanish America for 300 years, a racial mixing unlike any other in the world, a splintering of loyalties under fierce, charismatic warlords, a long, brutal civil war. Basing her talk on her forthcoming biography of Simón Bolívar, Arana will address how one man's vision transformed a continent.</p>	
	<p>TO BE HELD IN THE LIBRARY ON FRIDAY EVENING, MAY 13, 2011</p> <p>5:30 PM MEETING</p> <p>WILLIAM TWADDELL, JR. CHAIRMAN VINCENT J. BUONANNANO J. WILLIAM MIDDENDORF II EDWARD L. WIDMER, SECRETARY</p>		

On May 13 a packed house welcomed Marie Arana back to the JCB as the speaker at the Annual Meeting of the Associates. Chairman William Twaddell greeted the crowd and reported on the year's progress, then asked Director and Librarian Ted Widmer to introduce an old friend. Marie Arana was a Visiting Scholar at the JCB in 2009, working on a major English-language biography of Simón Bolívar, to be published soon. Arana enthralled the crowd with early memories of her childhood in Peru and the competing narratives of Peruvian history that she learned, as represented by family portraits of Peruvians who fought on different sides of the wars that catapulted Bolívar to the world stage. Throughout her talk, she explored the contradictions of an American hero embraced to this day by very different followers, all of whom compete to interpret his unfinished historical legacy. In addition to her work as a biographer, Arana is a prominent memoirist (her book, *American Chica*, told the story of her upbringing in Peru and the United States), a former publisher, and the editor in chief of "Book World," the book review section of the Washington Post. In the latter position, she worked with former First Lady Laura Bush to launch a partnership between the Post, the White House, and the Library of Congress to promote the National Book Festival on the Mall.

Ted Widmer

WARREN CONSERVATION FUND

The JCB community was saddened last fall by the death of William B. Warren, a long time supporter of the Library and member of the Board of Governors. Bill had a special interest in the conservation and preservation of rare books, manuscripts, and maps, and in recognition of his efforts we launched the JCB Adopt-a-Book program at our 68TH Annual Meeting of the Associates this past spring. The William B. Warren Conservation Fund, which we also hope to establish this year, will provide additional monies to enable us to attend to rare materials in the collection that need special and ongoing attention.

Ignace Chomé, *Arte de la lengua Chiquita*, San Joseph de Chiquitos, Bolivia, 1734(?) *Before and after conservation treatment supported by funds secured by William B. Warren through the Arthur F. and Alice E. Adams Foundation.*

THE RESTORED CHOMÉ

The author of this manuscript book, Ignace Chomé, was a missionary devoted to the study of Indian languages. He lived among the Chiquita Indians of South America for thirty years, dying in Cochabamba in 1768. Although the manuscript is not signed or dated, an early owner has noted Chomé's name on the first page.

In the field, Father Chomé "made-do" with what came to hand. Sometimes he was able to find good paper, sometimes not. Each batch of ink he made up was probably a bit different, depending on available ingredients. As a result, his carefully written manuscript, the work of many years, deteriorated in several sections almost to illegibility, while other sections remain almost pristine. The manuscript's deterioration was, unfortunately, hastened by a far-too-tight binding put on by a well-meaning owner sometime in the late 18TH century.

During the course of conservation we removed the binding and separated each heavily-glued signature, one by one. The paper was repaired when possible, but the most damaged pages could not be restored and were encased in mylar sleeves to prevent further deterioration. The disbound book has been digitized for preservation and to provide future ease of access for scholars. The sheets themselves are now housed in a custom-made protective box. *Susan Danforth*

JOIN THE ASSOCIATES

The John Carter Brown Library Associates support, with their membership fees, new acquisitions to the Library's world-class collections as well as research Fellowships for scholars who come to Providence to work with the Library's primary materials. Associates are invited to all special events, receive *inJCB*, the Library's Newsletter, enjoy discounts on books, maps, and posters published by the Library, and are eligible to attend special trips to New York and other locations. In the most recent year, 52 new Associates have joined, bringing the total number of current members to just about 900, up from 600 just a few years ago. Our goal this year is to break 1000. Help us do that. Please encourage your friends to join, and consider donating a gift membership as we approach the holiday season. Student memberships are especially attractive – for a mere fifteen dollars per annum, college undergraduates at Brown or any other university may join the Associates, receive all our publications, and form what we hope will be a lifelong engagement with this world-class collection. For information about membership and how to join, see www.jcbl.org or call Maureen O'Donnell at 401-863-1553.
